Homework 4

URL containing 3 graphs w/ IMDB info on Harrison Ford:
<file:///Users/samanthadelatorre/DSC106/Homework4/index.html>

Explanations:

The first graph is a wordcloud of 25 Harrison Ford movies, where emphasis on a movie is weighted by its box office sales overall in USD. The second graph is a radar chart that take the Metascores of each of the 25 Harrison Ford movies, groups them by genre (sci-fi, comedy, action, thriller, or drama), and takes the average. The third graph is a container chart that shows both binned Metascores to show Harrison Ford's average movie metascore and a scatter plot with the 25 movies and each of their individual score.
